Custom Rear Bag Hole Placement Instructions

The blue blocks represent the mat and the red blocks represent the rubber on the mat. Each square is 1". Choose the top left cell and bottom right cell of which you want the hole in the mat. Example: I25:Q37 would be a rectangle that's 13" long and 8" wide in that area (I25 is the top left and Q37 is bottom right). Printing the grid and coloring in the cells may help you determine the appropriate range. Type the range into the comments at checkout when ordering, after you select the check box. Example: I25:Q37

Rectangles (4 sides) with square angles only.
